Most people remember Joe Biden falling off the stage during the United States Air Force Academy commencement address.

I believe that fall was staged in order to distract from the bigger story.

The bigger story was that during the PBS live stream of the event, just before the 17 minute mark of the live stream, there was a "glitch" and the screen cut to a sound clip with video going in and out of President Trump talking about the 2020 stolen election and the importance of free elections.

It then switched back to the commencement.

There is no question that the Patriots are in control!
